No. 1980, dated 22nd March 1874.

RESOLUTION—By the Government of India, Financial Department.

Read again—

Financial Resolution No. 3556, dated 19th October 1877.

RESOLUTION.—In order to eliminate from the category of "Money in the Government treasuries and at credit of the Government in the Presidency Banks and their Branches," everything which is not actually available for immediate use as legal-tender in payment or on account, the Governor-General in Council is pleased to pass the following orders.

2. All legal-tender copper coin, and all silver coin which is legal-tender only for fractions of a rupee, shall be received in the first instance—

if coined at the Calcutta Mint—by the Comptroller-General, and

if coined at the Bombay Mint—by the Accountant-General, Bombay.

and shall be deposited in the Office of Issue of Paper Currency in Calcutta and Bombay respectively, where depôts of these coins shall be formed and supplied by the Mints from time to time upon the requisition of the Comptroller-General. Sub-depôts shall be formed, in like manner, at all the other Offices of Issue of Paper Currency, and at such other treasuries as the Comptroller-General may direct.

3. Legal-tender copper coin, and silver coin which is legal-tender for only fractions of a rupee, which may accumulate in any treasury or at any Presidency Bank or Branch of a Presidency Bank in excess of the current local demand for such coin, should, under the orders of the Comptroller-General, be at once returned into store in the nearest depôt or sub-depôt.

4. No copper or silver coin in store in such depôt or sub-depôts shall be reckoned as money, or included in any return of money in the public treasuries or at credit of the Government.

5. Legal-tender copper or small silver coins, to meet current local demands, will be supplied to treasuries from the nearest depôt or sub-depôt; but indents should not be made for such coin in excess of what is necessary to meet current local demands.

6. As soon as legal-tender copper coin or small silver coin is issued from a depôt or sub-depôt, it will be reckoned and treated as money; and as soon as any such coin is received into such depôt, it will cease to be treated as money. The net revenue from the copper coinage in any year will be reckoned upon the excess of the issues from the depôts and sub-depôts over the receipts from the public, or the treasuries or banks under paragraph 3.

7. As soon as occasion offers, the contracts with the Presidency Banks should, with the concurrence of the Directors, be revised, so as to remove the distinction now made in respect to coin which is not legal-tender without limit of amount. These present orders will obviate the need of any such distinction.

Ordered that the above Resolution be published for general information.

Ordered that this Resolution be communicated for information and guidance as follows:—

To the several local Governments and Administrations.

To the several Accountants-General and Deputy Accountants-General in independent charge.

NOTIFICATION.

The 17th June 1878.—It is hereby notified that, under Section 155 of Act VIII of 1878, the Lieutenant-Governor of Bengal has been pleased to prescribe the following rules for ascertaining and determining what spirit imported into British India shall be deemed to have been effectually and permanently rendered unfit for human consumption:—

RULES.

I.—Spirit imported into British India for use exclusively in arts, manufactures, or chemistry, which has been rendered effectually and permanently unfit for human consumption, is subject only to an *ad valorem* duty of ten per cent. under Article XXXII, Schedule A of the Indian Tariff Act XVI of 1875.

II.—Whenever such spirit is imported from the United Kingdom into any port of the Bengal Presidency before it can be admitted at the reduced rate of duty as aforesaid, the importer must satisfy the Collector of Customs at that port that the spirit has been rendered effectually and permanently unfit for human consumption, and must produce a certificate from a competent Customs or Excise authority of the United Kingdom that the spirit has already been subjected, under proper supervision in the United Kingdom, to a process by which it has been rendered effectually and permanently unfit for human consumption.

III.—If the importer cannot so satisfy the Collector of Customs, the latter shall cause such spirit to be examined, and, if necessary, rendered unfit for consumption in the manner hereinafter described as applicable to spirit imported from other countries than the United Kingdom.

IV.—Whenever such spirit as aforesaid is imported from other countries than the United Kingdom into any port of the Bengal Presidency, the Collector of Customs at that port shall send a sample of such spirit to the Chemical Examiner for examination and report, at the expense of the importer; and if the Chemical Examiner shall certify that the spirit has been rendered effectually and permanently unfit for human consumption, the Collector of Customs shall admit it at the reduced rate of duty.

V.—Whenever imported spirit is to be rendered effectually and permanently unfit for human consumption by officers of the Customs Department, the ingredient to be used for admixture with the spirit shall be caoutchoucine, and it shall be mixed with the spirit in the proportion of one part and a half of volume of the caoutchoucine to 98½ parts of volume of the spirit, which shall not be of less strength than 80 per cent. over proof.

VI.—But when it can be proved to the satisfaction of the Board of Revenue that the presence of caoutchoucine will render the spirit unsuitable for the purpose for which it is required, special sanction may be obtained for the use of woodnaphtha instead of caoutchoucine. In this case one part of volume of crude woodnaphtha shall be mixed with nine parts of volume of the spirit, which shall not be of a less strength than 30 per cent. over proof.

VII.—The caoutchoucine, or the woodnaphtha, before admixture with the spirit, must be tested by the Chemical Examiner to Government, who must certify to the Collector of Customs that it is of proper strength, fitted, if used in the proportions mentioned in rule V or VI, to effectually and permanently render unpalatable and unfit for human consumption the spirit with which it is mixed.

VIII.—Any expense which may be incurred by the Collector of Customs in rendering spirit unfit for human consumption, or in ascertaining that it has been so rendered, must be paid by the importer.

IX.—The use of spirit methylated or caoutchoucined according to these rules is not permitted in the manufacture or preparation of tinctures, medicated spirits, hyponitrous ether, or other pharmaceutical preparations or in the manufacture or preparation of any other article capable of being used as a beverage or internally as a medicine, with the exception of sulphuric ether, chloroform, and chloral hydrate.

2. The lease will be for a period not exceeding 50 years: the exact proportion of gross produce payable as rent, and the term, within the above maximum period, during which the rent offered shall be payable, are left to the tenderers.

3. In addition to the rent stipulated as payable, the lessee will be bound to defray the expense of maintaining peace in the island and on its coasts, and of the administration of Civil and Criminal Justice. The amount of such expense cannot at present be stated; but the Government are prepared to fix a maximum of Rs. 20,000 annually, beyond which the lessee would not be charged with any expenditure on these objects. The Government will, from time to time, fix the cost of such establishments, and such cost the lessee will be required to defray quarterly in advance.

4. The Government reserve to themselves the administration of Civil and Criminal Justice, Customs, Excise, and other Departments of Government, and the lessee will be entitled only to the produce of the soil, and to an exclusive right of fishery for one mile from high water-mark, and to the use for local requirements, and not for sale out of the island, of such timber as it produces, and of stone, lime, sand, and other building materials.

5. The rent will be taken in kind, and will consist of a fixed proportion not less than one-sixth of the gross produce of the island. In the case of cocoa-nuts, the fixed proportion must be delivered free at Port Blair or any other place in the Andamans that Government may from time to time direct; in the husk, in good condition and of good quality, and must have been gathered in such proportions at the times most suitable for the manufacture of coir and oil, respectively, as the Superintendent of Port Blair may from time to time require. In the case of other produce, delivery of which will be taken in the island, the Government may at any time require the lessee to commute the produce in kind for a money payment calculated at a rate 20 per cent. below the rate then ruling in the Rangoon market for similar produce of similar quality.

6. The number of living coconut trees on the island when it is transferred to the lessee will be ascertained, and the lessee will be bound under penalty to maintain at least that number of living coconut trees, at once planting and rearing young trees in place of those that may die, be blown down, or otherwise destroyed from time to time. The lessee is prohibited from cutting down any coconut trees without the written permission of the officer to whom Government may delegate authority to grant such permission.

7. The Government also reserve the right to appropriate sites on the island for public buildings, including dwelling-houses for officials, sanitarium, &c., paying as compensation only the cost of any improvements effected on the site appropriated. Also to appropriate any timber of spontaneous growth, and any stone, lime, sand, or other raw building materials existing in the island, required for such public buildings, enclosures, &c.

8. The Government also reserve a right to refuse their assent to any transfer of the lease of the island by the lessee for the time being. In the event of such power of refusal being exercised, the lessee will be entitled to claim that Government shall themselves take over the unexpired portion of the lease on a fair estimate of the value of the improvements effected by him or his predecessors.

9. Should the lessee in any way violate the provisions of the lease, or fail to pay the stipulated rent on the dates on which it falls due, or omit to take measures for the settlement and working of the island within a term of two years from the date of the lease, the Government will cancel the lease and re-enter on possession of the island without compensation.

10. The Government do not bind themselves to accept the highest, or any, tender made in reply to this advertisement. Tenders should be addressed to the Local Government or Administration of the Province in which the persons tendering may live or carry on business, and will be forwarded by such Local Government or Administration, after such inquiries into the circumstances of the tenderer and his ability to carry out the terms of his tender as may seem proper to the Government of India in the Department of Revenue, Agriculture, and Commerce. Tenders from persons in the United Kingdom should be forwarded through the Secretary of State.

11. The deed of lease to the tenderer whose offer may be accepted will be prepared at his costs and charges in all things by the Government Solicitor, and upon any questions arising between the tenderer and Government in regard to the form of the lease, the opinion of the Advocate-General shall be conclusive and equally binding on both parties.

12. Tenders must be sent in within a period of twelve months from the date of this advertisement.

GOVERNMENT OF INDIA.

Simla, the 14th June 1878.

Read the following—

No. 1980, dated 22nd March 1873.

RESOLUTION—By the Government of India, Financial Department.

Read again—

Financial Resolution No. 8558, dated 19th October 1877.

RESOLUTION.—In order to eliminate from the category of "Money in the Government treasuries and at credit of the Government in the Presidency Banks and their Branches," everything which is not actually available for immediate use as legal-tender in payment or on account, the Governor-General in Council is pleased to pass the following orders.

2. All legal-tender copper coin, and all silver coin which is legal-tender only for fractions of a rupee, shall be received in the first instance—

if coined at the Calcutta Mint—by the Comptroller-General, and

if coined at the Bombay Mint—by the Accountant-General, Bombay,

and shall be deposited in the Office of Issue of Paper Currency in Calcutta and Bombay respectively, where depôts of these coins shall be formed and supplied by the Mints from time to time upon the requisition of the Comptroller-General. Sub-depôts shall be formed, in like manner, at all the other Offices of Issue of Paper Currency, and at such other treasuries as the Comptroller-General may direct.

3. Legal-tender copper coin, and silver coin which is legal-tender for only fractions of a rupee, which may accumulate in any treasury or at any Presidency Bank or Branch

of a Presidency Bank in excess of the current local demand for such coin, should, under the orders of the Comptroller-General, be at once returned into store in the nearest depôt or sub-depôt.

4. No copper or silver coin in store in such depôt or sub-depôts shall be reckoned as money, or included in any return of money in the public treasuries or at credit of the Government.

5. Legal-tender copper or small silver coins, to meet current local demands, will be supplied to treasuries from the nearest depôt or sub-depôt; but indents should not be made for such coin in excess of what is necessary to meet current local demands.

6. As soon as legal-tender copper coin or small silver coin is issued from a depôt or sub-depôt, it will be reckoned and treated as money; and as soon as any such coin is received into such depôt, it will cease to be treated as money. The net revenue from the copper coinage in any year will be reckoned upon the excess of the issues from the depôts and sub-depôts over the receipts from the public, or the treasuries or banks under paragraph 8.

7. As soon as occasion offers, the contracts with the Presidency Banks should, with the concurrence of the Directors, be revised, so as to remove the distinction now made in respect to coin which is not legal-tender without limit of amount. These present orders will obviate the need of any such distinction.

Ordered that the above Resolution be published for general information.

ORDERED that this Resolution be communicated for information and guidance as follows:—

To the several local Governments and Administrations.

To the several Accountants-General and Deputy Accountants-General in independent charge.

To the Mint Masters, Calcutta and Bombay.

RESOLUTION—By the Government of India, Financial Department.

Read again—

Financial Resolution No. 3556, dated 19th October 1877.

RESOLUTION.—In order to eliminate from the category of "Money in the Government treasuries and at credit of the Government in the Presidency Banks and their Branches," everything which is not actually available for immediate use as legal-tender in payment or on account, the Governor-General in Council is pleased to pass the following orders.

2. All legal-tender copper coin, and all silver coin which is legal-tender only for fractions of a rupee, shall be received in the first instance—

if coined at the Calcutta Mint—by the Comptroller-General, and

if coined at the Bombay Mint—by the Accountant-General, Bombay,

and shall be deposited in the Office of Issue of Paper Currency in Calcutta and Bombay respectively, where depôts of these coins shall be formed and supplied by the Mints from time to time upon the requisition of the Comptroller-General. Sub-depôts shall be formed, in like manner, at all the other Offices of Issue of Paper Currency, and at such other treasuries as the Comptroller-General may direct.

3. Legal-tender copper coin, and silver coin which is legal-tender for only fractions of a rupee, which may accumulate in any treasury or at any Presidency Bank or Branch of a Presidency Bank in excess of the current local demand for such coin, should, under the orders of the Comptroller-General, be at once returned into store in the nearest depôt or sub-depôt.

4. No copper or silver coin in store in such depôt or sub-depôts shall be reckoned as money, or included in any return of money in the public treasuries or at credit of the Government.

5. Legal-tender copper or small silver coins, to meet current local demands, will be supplied to treasuries from the nearest depôt or sub-depôt; but indents should not be made for such coin in excess of what is necessary to meet current local demands.

6. As soon as legal-tender copper coin or small silver coin is issued from a depôt or sub-depôt, it will be reckoned and treated as money; and as soon as any such coin is received into such depôt, it will cease to be treated as money. The net revenue from the copper coinage in any year will be reckoned upon the excess of the issues from the depôts

and sub depôts over the receipts from the public, or the treasuries or banks under paragraph 8.

7. As soon as occasion offers, the contracts with the Presidency Banks should, with the concurrence of the Directors, be revised, so as to remove the distinction now made in respect to coin which is not legal-tender without limit of amount. These present orders will obviate the need of any such distinction.

Ordered that the above Resolution be published for general information.

Ordered that this Resolution be communicated for information and guidance as follows:—

To the several local Governments and Administrations.

To the several Accountants-General and Deputy Accountants-General in independent charge.

CIVIL.

No. 25, dated the 1st July 1878.

It having been brought to the notice of the Court that applications for the refund of process fees paid under Article 4 (d), Parts II, III, and IV of the Process Fee Rules, issued with Circular Order No. 10, dated 27th February last, are frequently much delayed, judicial officers are requested to warn parties, by notice posted in some conspicuous place in their courts, that although no limit of time is prescribed for such applications, yet, as these can be granted only on view of the stamps originally filed, which are liable to be destroyed with the process record at the end of a year, there is a probability, in case delay be allowed to occur, that it may become impossible to obtain a refund of the money due.

Sheriff's Office, the 10th July 1878.

REPORTED SHOAL, N. N. E. OF BAHRAIN.

Information has been received from Her Majesty's Political Resident at Bushire that the Master of the British Barque *Oribe* has reported the discovery of a dangerous shoal patch in the Persian Gulf, in latitude $27^{\circ} 27' N.$, longitude $50^{\circ} 59' E.$

The depth obtained on this shoal is not given, nor have any details been received as to how its position was determined.

As the shoal lies in the direct track of vessels, and as the whole of this portion of the Gulf is studded with dangers,—many of them being distinct pinnacles of rock or coral in deep water,—masters of vessels are cautioned to navigate with great care whilst in this neighbourhood.

By direction of the Government of India,

A. DUNDAS TAYLOR, *Comdr. (late I. N.),*

Strait of Malacca—Salangore—Malay Coast.

ALTERATION OF COLOUR OF LIGHT AT KLANG STRAIT.

The following information has been received from the Colonial Secretary at Singapore:—

With reference to a notice published in the Straits Settlements Government Gazette on the 27th July 1877, relative to the exhibition of a light on Middle Point, Klang Strait, it is now notified that a permanent *Bright* light, instead of a *Red* light, as stated in the above notice, will be exhibited on the 20th August 1878, in lieu of the temporary light now shewn.

The light will be placed on a frame-work of timber; will be 30 feet above high water, and should be visible through an arc of 75° , or between the bearings of North by West to North-East by East $\frac{1}{2}$ East, from a distance of about 10 nautical miles.

The light is situated on the South-West point of Pulo Lumaut. Position, latitude $2^{\circ} 52' 25'' N.$, longitude $101^{\circ} 14' 25'' E.$

The following directions are published for general information:—Masters of vessels bound to Klang, or through the Klang Strait to Salangore River, or towards Penang, should bring the light to bear about North-North-East, and then steer North by East until the passage is open on a bearing of North-East $\frac{1}{2}$ North, which will lead into the fairway about mid-channel.

Shoals extend about a cable's length on each side of the entrance, but the passage being broad and safe, there is no occasion for a steamer to borrow on either shore, except when fairly inside, to avoid the strength of an adverse tide, whilst the lead forms a sure guide to sailing vessels beating through the Strait.

The tides during the height of the springs are rapid and somewhat irregular; the flood sets from the northward after the first quarter, the ebb from the South-South-West also after the first quarter. It is high water, full, and change at about 4 h., the rise and fall being from 10 to 12 feet.

[Bearings are Magnetic and from Seaward. Variation, $1^{\circ} 30'$ Easterly in 1878.]

HIGH COURT NOTICES.

Circular Order issued by Authority of the High Court of Judicature at Fort William in Bengal.

CIVIL AND CRIMINAL.

No. 26, dated the 8th July 1878.

The Court are pleased to warn all Judicial Officers, subject to their superintendence in the Lower Provinces and Assam, against permitting one Abdool Ali, lately practising as a Pleader in Chittagong, from practising as such in any Court, Civil or Criminal.

2. This man's claim to be admitted and enrolled as a Pleader under Act XX of 1875, on the ground that he was a Pleader of the late Sudder Court under Regulation XII of 1833, was disallowed by the High Court in 1871. It appears that, notwithstanding this, the late Judge of the 24-Pergunnahs (Mr. Beaufort) issued a certificate to him authorizing him to practise as a Pleader in that district, and that, subsequently, he went to Chittagong, where also he has, on the strength of this certificate, been allowed to practise. The proceedings of the late Judge were wholly unauthorized, and the Court has ordered the certificate to be cancelled accordingly.

CRIMINAL.

No. 6, dated the 29th June 1878.

CAPE OF GOOD HOPE.—SOUTH COAST.

NOTICE TO MARINERS.

It is hereby notified that a Light Tower is being built about two hundred to three hundred yards within the pitch of a low point (Seal Point), situated one and three quarter miles westward of Cape St. Francis, to be hereafter called "Cape St. Francis Lighthouse."

The tower is a cylindrical stone structure, ninety-one feet high, with keeper's quarters attached at base, and is situated in latitude $34^{\circ} 22' 30''$ south and longitude $24^{\circ} 56' 20''$ east of Greenwich. It is intended to display a second order Heliophotal Revolving White Light, flashing at intervals of twenty seconds, with focal plane one hundred and one and a half feet above the base of the tower, and one hundred and eighteen feet above the level of high water.

The light will be visible in clear weather about sixteen and three quarter sea miles from the deck of a vessel fifteen feet above the sea. It will command the coast uninterruptedly to the westward, but will be cut off to the eastward by Cape St. Francis on the line N. 58° E. true, or would not be visible from the eastward on a bearing more southerly than S. 53° W. true.

The nearest existing lights are Cape Recife, about forty-five miles to the eastward, and Mossel Bay (Cape St. Blaize), about one hundred and thirty-three miles to the westward.

The tower will probably be ready for the reception of the Lenticular about January 1878, and the light may probably be exhibited some time between 1st March and 30th April 1878, of which due and precise notice will be given.

Mariners and others are now informed that the light will almost certainly be exhibited about on and after the 15th June next, 1878; and that the tower already is a conspicuous available day mark.

REPORTED SHOAL, N. N. E. OF BAHRAIN.

Information has been received from Her Majesty's Political Resident at Bushire that the Master of the British Barque *Oribe* has reported the discovery of a dangerous shoal patch in the Persian Gulf, in latitude $27^{\circ} 27' N.$, longitude $50^{\circ} 39' E.$

The depth obtained on this shoal is not given, nor have any details been received as to how its position was determined.

As the shoal lies in the direct track of vessels, and as the whole of this portion of the Gulf is studded with dangers,—many of them being distinct pinnacles of rock or coral in deep water,—masters of vessels are cautioned to navigate with great care whilst in this neighbourhood.

By direction of the Government of India,

A. DUNDAS TAYLOR, *Comdr. (late J. N.),*
Superintendent, Marine Survey of India.

Strait of Malacca—Salangore—Malay Coast.

ALTERATION OF COLOUR OF LIGHT AT KLANG STRAIT.

The following information has been received from the Colonial Secretary at Singapore:—

With reference to a notice published in the Straits Settlements Government Gazette on the 27th July 1877, relative to the exhibition of a light on Middle Point, Klang Strait, it is now notified that a permanent *Bright* light, instead of a *Red* light, as stated in the above notice, will be exhibited on the 20th August 1878, in lieu of the temporary light now shown.

The light will be placed on a frame-work of timber; will be 30 feet above high water, and should be visible through an arc of 75° , or between the bearings of North by West to North-East by East $\frac{1}{4}$ East, from a distance of about 10 nautical miles.

The light is situated on the South-West point of Pulo Lumaut. Position, latitude $2^{\circ} 52' 25'' N.$, longitude $101^{\circ} 14' 28'' E.$

The following directions are published for general information:—Masters of vessels bound to Klang, or through the Klang Strait to Salangore River, or towards Penang, should bring the light to bear about North-North-East, and then steer North by East until the passage is open on a bearing of North-East $\frac{1}{4}$ North, which will lead into the fairway about mid-channel.

Shoals extend about a cable's length on each side of the entrance, but the passage being broad and safe, there is no occasion for a steamer to borrow on either shore, except when fairly inside, to avoid the strength of an adverse tide, whilst the lead forms a sure guide to sailing vessels beating through the Strait.

The tides during the height of the springs are rapid and somewhat irregular; the flood sets from the northward after the first quarter, the ebb from the South-South-West also after the first quarter. It is high water, full, and change at about 4 h., the rise and fall being from 10 to 12 feet.

{Bearings are Magnetic and from Seaward. Variation, 1° 30' Easterly in 1878.}

By Direction of the Government of India,

Notification No. 225, dated the 31st July 1878.

Observations.—For many years past the Government of India have been anxious to equalise the burthen of salt taxation throughout the country. The rate of duty on salt has always been higher, and until the beginning of this year very much higher, in the Bengal Presidency than in the Presidencies of Madras and Bombay. In April 1861 the duty in the Lower Provinces of Bengal stood at Rs. 3-4 per maund, and in the Upper Provinces at Rs. 3 per maund, while in the Presidencies of Madras and Bombay it was only Rs. 1-3 per maund.

2. In the Northern Provinces of India, moreover, the cost of salt was further relatively enhanced by the greater distances from the sources of supply, and the prices of the article to the consumer were consequently on the whole much higher than elsewhere.

3. The financial exigencies of the State did not admit of the loss of any part of the revenue derived from the salt duties, and it became obvious that the only practicable way of reducing the excessive prices in Northern India was to equalise the duties throughout the whole country, for the great differences of which in the several provinces there was no justification in principle.

4. In the five years ending 1877-78 the average annual quantity of salt taxed in British India was about 240 lakhs of maunds, and the average annual duty was about six crores of rupees, giving an average rate of Rs. 2-8 per maund. As the object of the Government was not to increase the total revenue from the salt duty, but only to maintain the amount which had been previously realized, a rate of Rs. 2-8 per maund was taken for general adoption.

5. The duties in Madras and Bombay have accordingly been gradually raised, until in December last they were fixed at Rs. 2-8 per maund. At the same time the duty in Bengal was reduced in the Lower Provinces to Rs. 3-2 and in the Upper Provinces to Rs. 2-12 per maund.

6. As announced in the financial statement of the present year, the Government of India has been in negotiation with the Native States of Rajputana and Central India with a view to the adoption of measures which should admit of the abolition of the Inland Customs line, the maintenance of which had been necessary to prevent the salt produced in those states from passing untaxed into Northern India, and to secure the full rate of duty on the importation of the less highly taxed salt of the south, as well as the export duty on British sugar.

7. These negotiations have now been brought to a close, and the arrangements which will ensue will permit of the early removal of the customs line. The sugar duties have already been abrogated, and the Government now finds itself in a position in which another important step may be taken towards the fulfilment of its policy of equalising the duties by making a further reduction of 4 annas per maund in the Bengal Presidency. Thus, throughout the greater part of British India a uniform duty of Rs. 2-8 per maund has now been arrived at.

8. The Government of India is sensible that the changes in the rates of duty which have been necessary in carrying out its policy could not be made without causing some disturbance in the salt trade, and it takes the occasion of the present reduction of duty to

announce that, so far as those provinces are concerned in which the duty has now been fixed at Rs. 2-8 per maund, the measure of equalisation may be regarded as complete and final, and that no further alteration is contemplated, the financial position of British India not admitting of the hope of a lower general rate than Rs. 2-8 per maund being adopted within any period that can now be foreseen.

9. The Governor-General in Council thinks that this statement is desirable in the interests of the salt trade, so that any uncertainty as to the future rate of duty on salt may be removed.

ORDER.—Ordered that the above Resolution be published in the *Gazette of India*.

Secy. to the Govt. of India.

CAPE OF GOOD HOPE.—SOUTH COAST.

NOTICE TO MARINERS.

It is hereby notified that a Light Tower is being built about two hundred to three hundred yards within the pitch of a low point (Seal Point), situated one and three quarter miles westward of Cape St. Francis, to be hereafter called "Cape St. Francis Lighthouse."

The tower is a cylindrical stone structure, ninety-one feet high, with keeper's quarters attached at base, and is situated in latitude $34^{\circ} 22' 30''$ south and longitude $24^{\circ} 50' 20''$ east of Greenwich. It is intended to display a second order Holophotal Revolving White Light, flashing at intervals of twenty seconds, with focal plane one hundred and one and a half feet above the base of the tower, and one hundred and eighteen feet above the level of high water.

The light will be visible in clear weather about sixteen and three quarter sea miles from the deck of a vessel fifteen feet above the sea. It will command the coast uninterruptedly to the westward, but will be cut off to the eastward by Cape St. Francis on the line N. 53° E. true, or would not be visible from the eastward on a bearing more southerly than S. 53° W. true.

The nearest existing lights are Cape Recife, about forty-five miles to the eastward, and Mosel Bay (Cape St. Blaize), about one hundred and thirty-three miles to the westward.

The tower will probably be ready for the reception of the Lenticular about January 1878, and the light may probably be exhibited some time between 1st March and 30th April 1878, of which due and precise notice will be given.

Mariners and others are now informed that the light will almost certainly be exhibited about on and after the 15th June next, 1878; and that the tower already is a conspicuous available day mark.

Persian Gulf.

REPORTED SHOAL, N. N. E. OF BAHRAIN.

Information has been received from Her Majesty's Political Resident at Bushire that the Master of the British Barque *Oride* has reported the discovery of a dangerous shoal patch in the Persian Gulf, in latitude $27^{\circ} 27' N.$, longitude $50^{\circ} 59' E.$

The depth obtained on this shoal is not given, nor have any details been received as to how its position was determined.

As the shoal lies in the direct track of vessels, and as the whole of this portion of the Gulf is studded with dangers,—many of them being distinct pinnacles of rock or coral in deep water,—masters of vessels are cautioned to navigate with great care whilst in this neighbourhood.

By direction of the Government of India,

A. DUNDAS TAYLOR, Comdr. (late I. N.),
Superintendent, Marine Survey of India.

MARINE SURVEY DEPARTMENT, CALCUTTA, 18th July 1878.

NOTICE TO MARINERS.

(No. 20.)

Strait of Malacca—Salangore—Malay Coast.

ALTERATION OF COLOUR OF LIGHT AT KLANG STRAIT.

The following information has been received from the Colonial Secretary at Singapore:—

With reference to a notice published in the Straits Settlements Government Gazette on the 27th July 1877, relative to the exhibition of a light on Middle Point, Klang Strait, it is now notified that a permanent *Bright* light, instead of a *Red* light, as stated in the above notice, will be exhibited on the 20th August 1878, in lieu of the temporary light now shown.

The light will be placed on a frame-work of timber; will be 80 feet above high water, and should be visible through an arc of 75° , or between the bearings of North by West to North-East by East $\frac{1}{2}$ East, from a distance of about 10 nautical miles.

The light is situated on the South-West point of Pulo Lumaut. Position, latitude $2^{\circ} 52' 25'' N.$, longitude $101^{\circ} 14' 26'' E.$

The following directions are published for general information:—Masters of vessels bound to Klang, or through the Klang Strait to Salangore River, or towards Penang, should bring the light to bear about North-North-East, and then steer North by East until the passage is open on a bearing of North-East $\frac{1}{2}$ North, which will lead into the fairway about mid-channel.

Shoals extend about a cable's length on each side of the entrance, but the passage being broad and safe, there is no occasion for a steamer to borrow on either shore, except when fairly inside, to avoid the strength of an adverse tide, whilst the lead forms a sure guide to sailing vessels beating through the Strait.

The tides during the height of the springs are rapid and somewhat irregular; the flood sets from the northward after the first quarter, the ebb from the South-South-West also after the first quarter. It is high water, full, and change at about 4 h., the rise and fall being from 10 to 12 feet.

[Bearings are Magnetic and from Seaward. Variation, $1^{\circ} 30'$ Easterly in 1878.]

By Direction of the Government of India,

A. DUNDAS TAYLOR, *Comdr. (late I. N.),*
Superintendent, Marine Survey of India.

This Notice will affect the following Admiralty Charts:—North and South Sands, Strait of Malacca, No. 794a; Pulo Penang to Parcelor Hill, No. 793b; Strait of Malacca, Sheet 2, No. 1355; and Indian Ocean, northern portion, No. 74*6; also, Indian Marine Survey and Admiralty Light-lists (1878), and China Sea Directory, Vol. I (1878), page 69.
